

# Pioneering Indirect Risk Assessment

\* Preliminary trials of the tool, not to be regarded as a supply chain assessment

## Opportunities

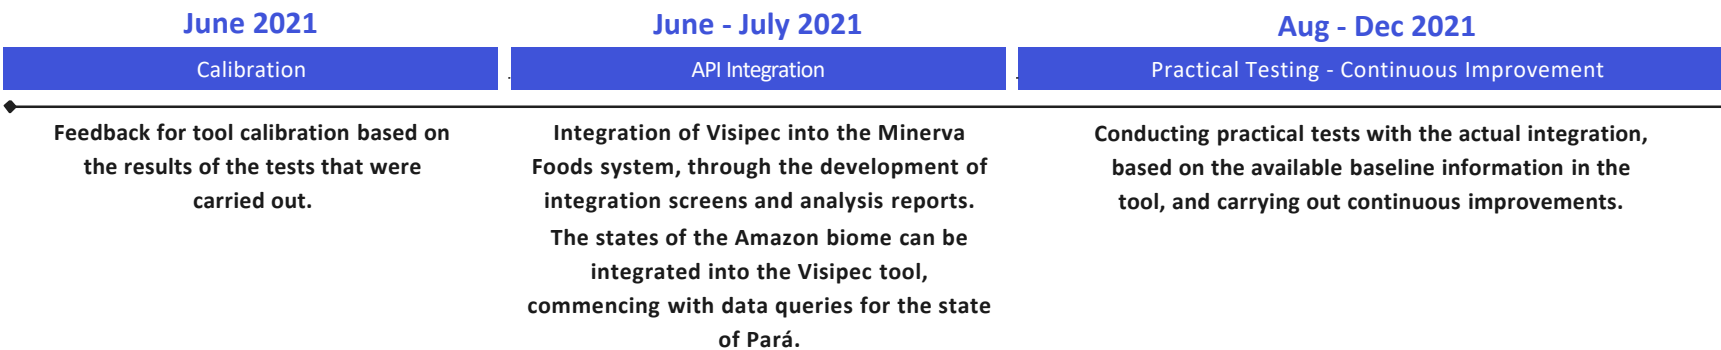

- Assess and monitor the GTFI Best Practices of direct suppliers and map the possible risks of the indirect supply chain.
- Identify behavior patterns and potential variances so that preventive actions can be taken.
- Gather information that will help foster producer engagement, promote their sustainable practices, and anticipate market demands.
- To provide greater security and transparency concerning the relations among the links of the Brazilian livestock supply chain.
- Enhance the trackability and monitoring of deforestation in the Amazon.
